# DWA_04.3 Knowledge Check_DWA4

_____

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

Types - The reason I find it useful is Primitives and Complex, like string, number and object and so on..
When you access a type you work directly on its value.
Variables -  Always use const or let to declare variables.
Not doing so will result in global variables. We want to avoid polluting the global namespace.
Functions - Use named function expressions instead of function declarations.

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

Hoisting - What is Hoisting and what does it do, is it almost like comments in a code?
Semicolons - Some Javascript has semicolons in and others doesnt - Is it wrong to leave it out and why do we add a semicolon in?
Accessors - What are Accessor Functions? Is it the same as a normal Function?
